To Whomsoever It May Concern

I am pleased to recommend Ms. Shanu Priya Garg, a highly motivated design student with strong interdisciplinary capabilities in UX Research, Visual Communication, Product Design, Sustainable Design and Human-Centered Design.

Shanu has consistently demonstrated creativity, analytical thinking, and professional dedication through her academic engagements. As a Bachelor of Design student at the Indian Institute of Information Technology Jabalpur, she has shown her ability in combining research methodologies with practical design solutions. She possesses strong research aptitude and has already contributed to academic discourse through her publication on inclusive game design for visually impaired users presented at ServDes 2025. Additionally, her innovative mindset is reflected in multiple patent filings related to accessibility, sustainability, and energy generation systems.

What distinguishes Shanu is her ability to integrate empathy-driven design with emerging technologies. She demonstrates excellent communication skills, collaborative spirit, and a proactive attitude toward problem-solving. Her ability to approach challenges with a systematic and research-oriented mindset will undoubtedly contribute to her success in a Master's program. I strongly support her application for the MEXT Scholarship.

I wish her all the best for her future endeavour.

Regards,

Dr. Amrita Bhattacharjee

To Whom It May Concern

It is my pleasure to recommend **Ms. Shanu Priya Garg**, a final-year Bachelor of Design (B.Des.) student at the Department of Design, Indian Institute of Information Technology, Design and Manufacturing (IIITDM) Jabalpur.

As the Head of the Department, I have observed Shanu develop into a highly motivated, intellectually curious, and socially conscious designer. She has built a strong interdisciplinary foundation in UX Research, Visual Communication, Product Design, Sustainable Design, and Human-Centered Design. Her work is distinguished by a research-driven approach, a deep understanding of user behavior, and a commitment to creating ethical, empathetic, and impactful design solutions.

Her academic accomplishments include a research publication on inclusive game design for visually impaired users presented at ServDes 2025, along with multiple patent filings in the areas of accessibility, sustainability, and energy generation systems. These achievements reflect her creativity, innovation, and ability to translate research into practical solutions.

Shanu's selection as one of only 19 Bharat Digital Fellows from a pool of over 25,000 applicants further demonstrates her exceptional potential. Through her work with Karnataka's Rural Panchayat Department, she gained valuable exposure to the implementation of digital initiatives in rural communities, strengthening her understanding of inclusive design and civic accessibility.

Shanu is dependable, collaborative, and sincerely committed to creating meaningful social impact through design. I strongly endorse her candidature for higher studies, research opportunities, or professional positions. I am confident that she will be a valuable asset to any institution or organization and wish her every success in her future endeavours.

Sincerely,

Dr. Sangeeta Pandit

Head, Department of Design

Indian Institute of Information Technology,

Design and Manufacturing (IIITDM) Jabalpur
